

Table of Contents

Introduction	1
1. The Bonanza's External Characteristics	7
Wings	7
Tails	9
The A36 Stretch	11
Deck Angle on the Ground	11
Overall Skin Friction Coefficient	12
2. Handling Qualities	14
Stick Forces and Trim with Gear, Flap, and Power Changes	14
Stalls	15
Spiral Stability	17
Directional Stability	18
Aileron-rudder Interconnect	19
Adverse Yaw	20
3. Simple Aerodynamics of the V-tail	21
Elevator Inputs	21
Rudder Inputs	21
Combined Elevator-rudder Inputs	22
4. The Maneuver-Gust Envelope	24
Lift and Load Factor	24
Limit and Ultimate Load Factors	31
Maneuvering Speed	32
Design Airspeeds	36
Gust Load Factor	39
The Combined Maneuver-gust Envelope	45
Finally	47
Appendix	48

5. Performance Fundamentals—Thrust and Drag	49
Thrust	49
Thrust Horsepower Required	57
6. Takeoff	63
Routine Takeoff	63
Short Field Takeoff	68
Climb Angles with and Without Flaps	73
Summary	75
Conclusion	75
7. Climb	77
Maximum Rate and Maximum Angle	77
Cruise Climb	86
Conclusion	87
8. Cruise	89
How High - at 75 Percent Power?	90
Altitude for Best Speed - 65 Percent Power	94
Trip Time Vs. Fuel Used	96
The Effect of Wind	97
Other Factors	98
9. Leaning	100
The Continental Service Bulletin	100
Continental's Recommendations for Six-probe Installations	101
Single Probe Installations	104
Leaning in Descent	104
The IO-550	105
Summary	106
10. IFR by the Numbers	107
The Ruts	108
Near the Final Approach Fix	110
Let Down to Minimums	111

At the MDA	118
Missed Approach	119
Landing and Flaps	119
Takeoff to Cruise	119
High Speed Descent	120
When Instruments Fail	121
Summary	122
11. Landing	124
Handbooks - Old and New	125
Balked Landing	126
12. Weight and Balance: Introduction	129
To Be Legal	129
13. Weight	131
Speed	131
Climb	131
Takeoff Roll	132
Stalls	133
Landing Roll	134
Gliding Range	134
Local Weight Limits	134
Summary	135
14. Center of Gravity–General Considerations	136
Static Longitudinal Stability	137
Wing Forces and Moments	138
Stability of the Wing Alone	143
The Tail's Contribution to Longitudinal Stability	144
Stick Forces	146
Airspeed and CG-A Digression.	151
Directional Stability	151
Summary Chart	153
Conclusion	153

15. Bonanza CG Considerations	154
Cg Limits and Bonanza Geometry	154
Loading Past the Forward Limit	157
The Aft Limit with Full Fuel	158
The Problem with Fuel Burn	159
Two Short Notes	160
Summary	161
16. Introduction to Emergencies	162
17. Maintaining Control in Rough Air	163
Summary	165
18. Gyro Failure	166
Maximizing Stability	167
Summary	170
19. Emergency Maximum Range	171
Maximum Range—Zero Wind	172
Adjustments for Wind	178
Summary	179
Appendix	179
20. Engine Failure	183
Immediate Action Items	183
Glide Speeds	184
The Forced Landing	187
Engine Failure on Takeoff	188
Turbocharged Bonanzas	192
Summary	194
21. Miscellaneous Minor Emergencies	195
Unlatched Door	195
Manual Gear Extension	196
22. Conclusion: Some Important Speeds	198

Finally 202
