

Instrument Flying Update

Table of Contents

Preface	1
Introduction	3
1. Understanding WAAS	9
Errors in GPS * WAAS Corrections Methods * Correcting Ephemeris and Satellite Clock Errors * Ionospheric and Atmospheric Delay Correction * Satellite Geometry * Your GPS/WAAS Receiver * HAL and VAL * Altitudes in the Database * WAAS Accuracy, Availability, and Integrity * The Future for WAAS	
2. LPV, LNAV/VNAV, and LNAV Approach Design Concepts	31
The LNAV Approach * The Final Approach Segment * The Intermediate Segment * Initial Approach Segment * Feeder Routes * LNAV/VNAV Approach Construction * LPV Approach Design Inside the Final Approach Fix * Quirks Regarding Minima * Missed Approach	
3. Flying with WAAS	67
Preflight and Alternate Requirements with WAAS * Interpreting RNAV (GPS) Plates with LPV and/or LNAV/VNAV Minima * A Digression on Cold Weather Altimetry * Back to the Approach Briefing * Flying the LNAV/VNAV or LPV * Cautions and Quirks	
4. The New RNAV Departures, Q-routes and T-routes	101
IFR Departures * RNAV SIDs and ODPs * Training for RNAV SIDs * Q- routes and T-routes	
5. Ground Proximity Warning Systems	121
A Little More History * EGPWS and TAWS * Flying with TAWS	
6. ATC's Minimum Safe Altitude Warning System	139
Background on MSAW * How MSAW Works * Successes and Failures * Gaps in the MSAW System * The MSAW Warning * MSAW Saves * The Lesson	
7. Radar Vectors and Minimum Vectoring Altitudes	149
Minimum Vectoring Altitude (MVA) * Vectors Below the MVA * Vectors to a Visual and Charted Visual Approaches * Preview	
8. The Midnight Departure	169

9. Getting Established on an Approach	183
The Change in 2006 * Constraints on the Controller’s Use of Vectors * Vectors to Final When There is No Course Change at the FAF * Vectors to Final When There is a Course Change at the FAF * Examples of How to Get Established * Conclusion and Thoughts on GPS	
10. “Proceed Direct OZNUM”.	215
The Facts * Analysis and Lessons * Demanding Appropriate Transitions onto Approaches * MSAW Alerts * Would TAWS have Saved the Day?	
Postscript	241
